

North Arm Cove DRAINAGE UPGRADE

We are upgrading the stormwater drainage system along 89 - 93 Cove Boulevard, North Arm Cove.

There will be single lane traffic during the work. Please observe reduced speed limits and traffic control measures on site.

Access to no. 91 and 93 Cove Blvd will be restricted. The contractor will be in contact with the affected property owners.

The drainage upgrade will begin in late June and is expected to be completed by August.

If you have any questions, please contact Council's Drainage Engineer, Michael Millang:
